

## Elkesley Primary and Nursery School Geography – Links to Fundamental British Values

British Values	
<b>Democracy</b>	In geography, we have respect for our fellow pupils and encourage everyone to have the confidence to express their ideas and opinions regarding geographical issues such as pollution, environmental issues, water and globalisation.
<b>Rule Of Law</b>	Within geography, children will consider and discuss a range of laws including those around endangered animals, climate change, deforestation, global warming and the need to follow laws to keep people, animals and the earth safe. Within map and costal work, children will consider who is responsible for each area.
<b>Individual Liberty</b>	In geography, we create a safe space for children to have a voice which enables them to express their own opinions surrounding the world around us and to be respectfully heard and listened to. In geography, when comparing and contrasting locations children will also explore the people living in these environments and their own individual liberties. Children will have the freedom of making their own choices and decisions about the world, the children also know that there are boundaries and which must be respected.
<b>Mutual respect and tolerance of those with different faiths and beliefs</b>	Mutual respect is taught and given when children are expressing their opinions and beliefs about different geographical parts of the world and societies within in them. In geography, children will consider questions regarding how different cultures live and work throughout the world. Children have the opportunity to explore how areas have changed and how the diverse needs in society has changed them. Children will use a range of books that focus on a variety of cultures. In Key Stage 2, children learn about trade and where food comes from – respecting the cultures of those discussed.
